WEBINAR >>>>

DIGITAL TRANSFORMATION OF CONSTRUCTION BUSINESS PROCESSES WITH BIM AND ERP

This webinar explores how two key information systems, Building Information Modelling (BIM) and Enterprise Resource Planning (ERP), are transforming the construction industry.

BIM: Excels at managing design information, crucial in design-and-build projects, enhancing quantity take-off and estimation accuracy.

ERP: Focuses on optimizing project execution by streamlining procurement, resource allocation, and financial management, providing robust tools for cost control and project tracking.

Let's find out how these powerful digital solutions empowers many stakeholders, including Contractor Quantity Surveyors, to achieve greater efficiency and success.

MODERATOR

Ch.QS Dr. Suranga Jayasena

Senior Lecturer, Department of Building Economics, University of Moratuwa, Sri Lanka. Expertise in construction information technology, BIM, and Quantity Surveying

SPEAKER

Ch.QS Majith Kodithuwakku

General Manager of Estimates and Contracts, International Construction Consortium (Pvt) Ltd, Sri Lanka. Expertise in BIM, ERP, and Quantity Surveying

SPEAKER

Eng. Dilini Peiris

Manager-Planning, International Construction Consortium (Pvt) Ltd, Sri Lanka. Expertise in ERP systems and construction planning

SPEAKER

Eng. Miyuru Prasanga

Senior Structural Design Engineer and BIM Coordinator, International Construction Consortium (Pvt) Ltd, Sri Lanka. Expertise in BIM implementation and structural design

WEDNESDAY

11 DECEMBER 2024

START AT

2.30 PM (MYT)
